

Xtrafriq Tech Consult

Product Management & Technology Consulting Company

PRODUCT MANAGEMENT-LED TECHNOLOGY DELIVERY

We design, build and deliver digital products and technology systems that help organisations operate, grow and scale.

Xtrafriq Tech Consult supports public institutions, development partners, enterprises and growth organisations from Accra, Ghana, with remote delivery worldwide. Work is led by product and project management, then executed through engineering, security and cloud practice so that systems reach production and remain operable.

Core capabilities

Service line	What we deliver
Product Strategy & Leadership	Discovery, positioning, roadmaps, OKRs and execution leadership that keep delivery aligned to user value and organisational goals.
Project Management (Technology + AI)	Scope, milestones, risk and reporting for software and non-software programmes, with tooling and automation to improve predictability.
Enterprise & Government Platforms	Operational platforms for transport, logistics, finance and administration, including role-based access, auditability and reporting.
Mobile & Web App Development	Production-ready applications with product-led UX, performance, accessibility and maintainable architecture.
Cybersecurity & Risk	Threat modelling, secure SDLC, access control and practical risk controls introduced early in delivery.
Cloud Architecture & Reliability	Scalable cloud foundations, cost control, observability and reliability practices for growth.
Agile Delivery & Enablement	Sprint discipline, QA gates, GitHub workflows and team enablement that increase delivery predictability.

Differentiators for procurement

- Product Management-Led Technology Delivery—strategy, delivery leadership and engineering in one engagement model.
- Evidence from shipped systems in transport, development programmes, commerce and consumer mobile—not slide-deck concepts.
- Comfortable in regulated and operational environments: booking, logistics, finance dashboards, role-based access and reporting.
- Accra-based with remote worldwide delivery; English-language engagement and reporting.

Selected experience

Illustrative delivery relevant to tenders, RFPs and institutional programmes.

ISTC GHANA · TRANSPORT

Integrated Transport System

Led the product lifecycle for a nationwide transport platform covering passenger booking, fleet management, terminal operations and finance dashboards. Outcome: operational scale across a national network with improved booking reliability.

GIZ · DEVELOPMENT PARTNER

Digital Skills Programme

Delivered curriculum, workshops and a lightweight learning system to upskill local teams. Outcome: 200+ participants trained and curriculum adopted by local partners.

KTZ · CONSUMER PRODUCT

Mobile application launch

Full-cycle product management from ideation to App Store launch, including roadmap, UX collaboration and sprint execution across iOS and Android. Outcome: 30K+ installs and 95% user satisfaction reported on the engagement.

MYAFRIQUEMART & FARMERTORKS · COMMERCE

E-commerce platforms

Built marketplace platforms from concept to launch, leading cross-functional teams through the full product lifecycle. Outcome: end-to-end platform delivery with multi-vendor support.

Geographic coverage and delivery model

Headquarters and primary delivery base: Accra, Ghana. Clients and users have been reached across 10+ countries.

Engagements are delivered on-site in Accra, remotely, or in a hybrid model. Typical work includes discovery with operational stakeholders, a scoped delivery plan, iterative build with QA gates, and handover that operations teams can run.

Sectors

Transport and logistics · Public-sector and regulated operations · Development and capacity building · Multi-vendor commerce and agri-commerce · Consumer mobile products · Alumni and membership platforms

How to instruct us

Share the tender pack, terms of reference, or a short brief. We will confirm fit, proposed service lines, delivery approach and commercial terms. Contact:
